Revolution

The state of being unpredictable or uncertain

"The unpredictability of the weather made it difficult to plan the outdoor event."

B2

The ability to create new and original ideas, solutions, or products

"The company encouraged creativity among its employees by providing a relaxed work"

B2

The introduction of new or improved ideas, methods, or products

"The company's innovation in technology led to a significant increase in sales."

B2

A strong personal or financial interest in something

"The company has a vested interest in the success of the new project."

B2

A system of ranking people or things in order of importance

"The company has a strict hierarchy, with clear lines of authority and decision-making."

B2

To give someone or something a bad reputation

"The company's mistake was stigmatized by the media, leading to a loss of customers."

B2

Very deeply or strongly

"The news of the natural disaster had a profoundly sad effect on the community."

B2

Having no physical body or form

"The professor's disembodied voice was heard over the intercom, giving instructions to the students."

B2

A major change or upheaval in a system or society

"The technological revolution has transformed the way we communicate and work."

B2

Harmless or gentle

"The doctor's benign smile put the patient at ease during the examination."

Conclusion

The study of the characteristics of a population

"The demography of the city is changing, with a growing population of young professionals."

B2

Causing a major change or transformation

"The new policy had a transformational effect on the company, leading to significant growth and success."

B2

In a radical or extreme way

"The company needs to radically change its business model to stay competitive in the market."

B2

The devaluation of academic qualifications due to an increase in the number of people holding them

"The academic inflation has made it difficult for graduates to find jobs, as employers are looking for more advanced qualifications."

B2

Characterized by constant change or progress

"The dynamic nature of the company has led to innovative solutions and products."

B2

Showing a great deal of variety

"The city has a diverse population, with people from different cultures and backgrounds living together."

B2

Relating to the sense of movement or action

"The dancer's kinesthetic awareness allowed her to move with precision and control."

B2

Allowing or intended for two-way communication or action

"The interactive exhibition allowed visitors to engage with the art and technology on display."

B2

The final part of a speech, essay, or argument

"The conclusion of the speech was met with applause and cheers from the audience."

B2

Small separate sections or rooms

"The brain is not divided into separate compartments, but rather is a complex and interconnected system."

B2

Achieve

Afford

The ability or power to do something

"The company has the capacity to produce high-quality products at a low cost."

B2

The most important or memorable point of a conversation or event

"The takeaway from the meeting was that the company needs to focus on innovation and customer satisfaction."

B2

The act of giving your time, energy, or resources to something

"The dedication of the team to the project led to its successful completion."

B2

Unusually good or impressive

"The exceptional talent of the musician was evident in her performance."

B2

To decide what is most important and deal with those things first

"The company needs to prioritize its projects and focus on the ones that are most likely to be successful."

B1

To think about something carefully, often in a calm and quiet way

"The artist likes to contemplate nature and find inspiration for her work."

B2

To successfully bring about or accomplish something

"The team achieved their goal of increasing sales by 10% within the first quarter."

B1

To work together with someone or a group to achieve a common goal

"The team collaborated on the project, sharing their ideas and expertise to create something innovative."

B1

To have enough money or resources to pay for something

"The company can afford to invest in new technology to improve its operations."
